# Deleting existing user

GIVEN	WHEN	THEN (expected)	THEN (actual)
<p>The user already exists and is connected in his account.</p>  <p>The screenshot shows the 'Something Fruity' account page for a user named 'Walter'. The page displays the user's name, email address (walterberg@indreal.com), and game statistics (20 level, 2 games, 2 points). A 'Delete' button is visible at the bottom of the user information section.</p>	<p>The user wants to delete his account from the account page.</p>  <p>This screenshot is identical to the previous one, but the 'Delete' button is highlighted with a red rectangular box, indicating the user's action.</p>	<p>After clicking the delete button, the user is disconnected from his account, the account is deleted and the user is back in the login page. A message appears confirming the deletion of the account.</p>	 <p>The screenshot shows the login page of 'Something Fruity'. At the top, a green banner displays the message 'Your account has been successfully deleted.' Below the banner are the login fields for 'Username' and 'Password', and a 'Log In' button. The footer indicates the site is implemented in Python using the Flask framework.</p>
