

Tutor Feedback from Project Report

Knowledge: A good product description, with some interesting design details. A good selection of requirements and a well thought out plan: merit

Application of Knowledge: A surprising omission of the gherkin version of the requirements - a possible missed opportunity? Useful estimates but no indication on how they were calculated? Pass

Criticality: The different sprint diagrams/ plans seem to be inconsistent - can you check them? Sprints seem to be generally SMART. It would have been good to have seen more explanation around WHY scrum was chosen. Pass

Structure and Presentation: Generally well presented, with good structure but the presence of a few typos and errors in referencing indicate a lack of a final proofread, perhaps? Merit.
