Meeting 5   21st April 2022

Attendees
- Aidan, Ian

Agenda
- Go through proposed code and write user stories
- Add stories to github project
- Assign stories to individuals
- Draw up ground rules about branch naming, writing tests, and making pull requests

Notes

We have agreed to use Flake8 and Pylint on our codebase.
We should run bandit for any potential security issues

Make branches - needs at least one tick before being merged into develop.
When you open a PR, post a message on Slack asking for reviewers
